VanderBosch Plumbing Begins

VanderBosch Plumbing Inc. was started 30 years ago by a frustrated real estate developer Hugh Hodur. Hodur was involved in gut rehabs of 3 1/2 story walk ups and midrise residential

buildings through out Chicago's neighborhoods. Those projects included condominium conversions and apartment rentals.

Hugh was frustrated by the lack of honest, professional, skilled, and reliable plumbers that could be counted on to get the job done on time and on budget.

Hodur was also concerned with the lack of quality attention to detail that was being give to one of the most critical systems in a building.

Hugh had a love and respect for these old buildings. He was reworking something that had lasted 100 plus years. He was determined that they would stand the test of time when he was done.

Fast forward 2005

After 23 years of condominium conversions and development Hodur refocuses and takes VanderBosch Plumbing into the residential and light commercial plumbing service market and it's a hit.

We have a much better perspective than other plumbing companies on what condominium managers, owners, board members, and HDAs want in a plumbing heating service provider. Our company was started to specifically serve those needs. And we reliably deliver outstanding knowledge, quality, value, and integrity to every task we perform.

Here is what you can expect

Clear concise proposals that are easy to understand and easy to distribute.

Flat rate pricing that is comprehensive in nature.

No hidden surprises we stick to the price we quoted.

Excellent communication and coordination as to what is required by the association and managers for us to accomplish the task. Examples: water shut downs or access to residents units.

Sticking to promised schedules and appointment times.

Maintenance programs that truly free up managers time.

The ability to schedule directly with residents or janitors without direct involvement of managers freeing them up of other tasks.

Employees that are the real deal. Plumbers that have the knowledge training and customer service instincts paired with the best tools and latest equipment to do what others often can't.

The ability and knowledge to work with long term capital improvement budgets or help develop them for plumbing, sewerage, drainage, and heating systems.
